Order Picker License Kamloops

Order Picker License Kamloops - Order preparation operation or order picking as it is more normally known is a process used within warehouse operations and comprises staff known as order pickers. The order picker's duty is to take and collect articles in certain quantities so as to fulfill the customer's orders before shipment. Order picking is a simple warehousing method. The effectiveness in which this job is accomplished can be directly related to the productivity of a supply chain. Thus, order picking is among the most controlled logistic methods. Order picking falls within the category of the warehouse management system.

There are specific kinds of order picking which consist of: pick to box method, wave picking method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the things from his or her station. The box then moves to the other picking locations until the client order is complete. In this particular technique, there is no movement of the order picker personnel. In the wave picking method, the order pickers move round to be able to collect the required products for numerous orders. The piece picking or picker to part method is similar where the order picker or pickers move to gather the items needed but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, products are brought to the orderpicker by an automatic system like a conveyor system or an automatic storage system. In the zone picking method, every order picker is assigned to one specific area. They are responsible for only realizing order picking in this particular area.
