

Aerial Lift Train the Trainer Kamloops

Aerial Lift Train the Trainer Kamloops - The train the trainer program meant for aerial lifts helps to teach the trainers how to safely train prospective operators in an industrial situation. Trainers will be provided with in-depth instruction about the workings of aerial lift machinery. The program is provided on an open enrollment basis and delivered at select training places. Prior to certification, trainers are assessed and graded based on their knowledge and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the number one training provider within the business, we provide the best hands-on training possible through opportunities to practice concepts and techniques learned inside the classroom. In addition to hands-on experience, trainers develop general understanding of instructional methods and equipment theory, field and classroom communication skills, and ability to effectively train and evaluate operators. Trainers will gain an understanding about what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional techniques involved in communicating concepts within a classroom and/or field situation. Knowledge requires a training component to be efficient in workplace situations. There are three factors of machine operation which the trainer must learn how to convey to operators: what to perform; how to do it; and why it should be done.

In the program, trainers will be provided with the latest, detailed reference material to better help them convey the information to machine operators. The manuals utilized, contain detailed information on all aspects of industrial mobile equipment operator training. Incorporated in the package are training aids that provide a visual reference to improve the learning experience. The equipment-specific training products include essential materials for both the operator and the trainer: overhead transparencies, videos/DVD's, safety message posters, equipment models; digital training aids and stability pyramid.
